Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 3, the term "preferably" is vague and indefinite and cannot be used in a claim. See also claim 4, lines 2 and 11 and claim 7, lines 2 and 3. In claim 3, line 2, "for example" is vague and indefinite. See also claim 5, line 2.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipate by Dillon (US Patent 3,729,773).

Dillon teaches a method for washing and chilling eviscerated fowl which is structurally similar to the Applicant's claimed method for scalding of slaughtered poultry. More specifically, the method includes birds shackled by their feet while conveyed through a scalding chamber. The chamber is precisely controlled heated atmosphere of humid, hot air. The air is recirculated and blown directly onto the poultry. The scalding period is determined by the length and course of the conveyor. The chamber extends a relatively large height which extends through two or more levels. See Figure 2.

Regarding claim 3, the water is heated to a temperature that scalds the poultry, and as

such, this scalding temperature is believed to an extra high temperature. Further, the remaining claim language "for example in the range of approximately 85 degrees C" is vague and indefinite, such that it is not considered to be a positively claimed claim language.

Allowable Subject Matter

Claims 2 and 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

Summary: Claims 1-8 are rejected.
